

## **By e-mtb among the vineyards of the Via Francigena**

September and October with their mild temperatures are undoubtedly the best months for a relaxing mountain bike ride, better if electric.

In addition, the beauty of a countryside that is painted in typical autumn colors will be the setting for this 30 km tour that, starting from Montaione, will take us along one of the most evocative stretches of the Via Francigena through vineyards and olive groves passing through Gambassi Terme and then return again to Montaione.
